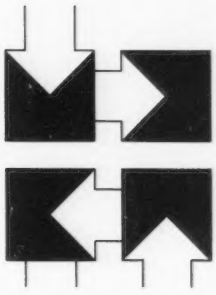
JOURNAL OF PROCESS CONTROL



# Index to volume 2 (1992)

No 1 pp 1–56
No 2 pp 57–112
No 3 113–168
No 4 169–224

## Article Index

### Number 1

Adaptive control of a rapid thermal processor using two long-range predictive methods
*J. Bordeneuve Guibé, J. M. Dilhac and B. Dahhou* 3

Model reference control of non-linear systems with relative order two: application to a semibatch reactor
*M. Chidambaram and Y. S. N. Malleswararao* 9

Non-linear controllers for a heat exchanger
*Y. S. N. Malleswararao and M. Chidambaram* 17

A control scheme for packed bed reactors having a changing catalyst activity profile. I: On-line parameter estimation and feedback control
*L. C. Windes and W. H. Ray* 23

A control scheme for packed bed reactors having a changing catalyst activity profile. II: On-line optimizing control
*L. C. Windes and W. H. Ray* 43

### Number 2

Evaluating estimation of gain directionality. Part 1: Methodology
*H. W. Andersen and M. Kümmel* 59

Evaluating estimation of gain directionality. Part 2: A case study of binary distillation
*H. W. Andersen and M. Kümmel* 67

State estimation and control of spray etching processes
*A. S. Kao, H. G. Stenger, C. Georgakis and K. L. Covert* 87

Control of a continuous fermentation process
*B. Dahhou, M. Lakrori, I. Queinnec, E. Ferret and A. Chéruy* 103

### Number 3

Intelligent control
*K. J. Åström and T. J. McAvoy* 115

Non-linear adaptive control of fermentation processes utilizing *a priori* modelling knowledge
*M. Ramseier, P. Agrawal and D. A. Mellichamp* 129

Local observability and controllability of stirred tank reactors
*D. Dochain and L. Chen* 139

Experimental demonstration of non-linear model-based in-line control of pH
*S. K. Mahuli, R. R. Rhinehart and J. B. Biggs* 145

CAD package for industrial process identification
*W. C. Amaral, L. V. R. Arruda, S. S. Bueno, A. S. Barbara, M. A. Silva, H. J. Almeida Jr. and M. C. Castanho* 155

#### Comment Article

Neural networks: some questions and answers
*J. W. Ponton* 168

### Number 4

Fault-tolerant control of paper machine headboxes
*Q. Xia and M. Rao* 171

Design, analysis and realization of a state control system for an individual distillation column
*G. Fieg, G. Wozny and L. Jeromin* 179

Identification of non-linear processes using reciprocal multiquadric functions
*M. Pottmann and D. E. Seborg* 189

A fast procedure for the training of neural networks
*C. Peel, M. J. Willis and M. T. Tham* 205

Performance adaptive control
*A. R. McIntosh, D. G. Fisher and S. L. Shah* 213

## Author Index

Agrawal, P. 129
Almeida Jr., H. J. 155
Amaral, W. C. 155
Andersen, H. W. 59, 67
Arruda, L. V. R. 155
Åström, K. J. 115

Barbara, A. S. 115
Bordeneuve Guibé, J. 3
Bueno, S. S. 155

Castanho, M. C. 155
Chen, L. 139
Cheruy, A. 103
Chidambaram, M. 9, 17
Covert, K. L. 87

Dahhou, B. 3, 103
Dilhac, J. M. 3
Dochain, D. 139

Ferret, E. 103
Fieg, G. 179
Fisher, D. G. 213

Georgakis, C. 87

Jeromin, L. 179

Kao, A. S. 87
Kummel, M. 59, 67

Lakrori, M. 103

Mahuli, S. K. 145
Malleswararao, Y. S. N. 9, 17
McAvoy, T. J. 115
McIntosh, A. R. 213
Mellichamp, D. A. 129

Peel, C. 205
Pottmann, M. 189

Queinnec, I. 103

Ramseier, M. 129

Rao, M. 171
Ray, W. H. 27, 43
Rhinehart, R. R. 145
Riggs, J. B. 145

Seborg, D. E. 189
Shah, S. L. 213
Silva, M. A. 155
Stenger, H. G. 87

Tham, M. T. 205

Willis, M. J. 205
Windes, L. C. 23, 43
Wozny, G. 179

Xia, Q. 171

## Keyword Index

**Activation functions**
Radial basis function networks, Non-linear processes 189
**Adaptive control**
Rapid thermal processing, Parameter estimation 3
Fermentation, Non-linear control 103
Performance tuner, Generalized predictive control 213
**Adaptive non-linear control**
Modelling, Fermentation 129
**Artificial intelligence**
Fuzzy logic, Neural networks 115

**Batch reactor**
Model reference control, PID action 9

**CAD**
Process identification, Petrochemical industry 155
**Catalyst activity**
Packed bed reactors, Parameter estimation 23
Packed bed reactors, On-line optimization 43
**Controllability**
Observability, Stirred tank reactors 139

**Directionality**
Multivariable, Identification 59
**Distillation**
Multivariable, Identification 67
State observer, State controller 179

**Fault-tolerant control**
State estimation, Pulp and paper industry 171
**Fermentation**
Non-linear control, Adaptive control 103
Modelling, Adaptive non-linear control 129
**Fuzzy logic**
Neural networks, Artificial intelligence 115

**Generalized predictive control**
Adaptive control, Performance tuner 213

**Identification**
Multivariable, Directionality 59
Multivariable, Distillation 67

**Kalman filters**
State estimation, Spray etching 87

**Model reference control**
PID action, Batch reactor 9
**Modelling**
Adaptive non-linear control, Fermentation 129
Non-linear control, pH 145
**Multivariable**
Identification, Directionality 59
Identification, Distillation 67

**Neural networks**
Fuzzy logic, Artificial intelligence 115
Training, Principal components analysis 205
**Non-linear control**
Fermentation, Adaptive control 103
Modelling, pH 145
**Non-linear processes**
Radial basis function networks, Activation functions 189

**Observability**
Controllability, Stirred tank reactors 139
**On-line optimization**
Packed bed reactors, Catalyst activity 43

**PID action**
Model reference control, Batch reactor 9
Relative order two, Robustness 17
**Packed bed reactors**
Catalyst activity, Parameter estimation 23
Catalyst activity, On-line optimization 43
**Parameter estimation**
Rapid thermal processing, Adaptive control 3
Packed bed reactors, Catalyst activity 23
**Performance tuner**
Adaptive control, Generalized predictive control 213
**Petrochemical industry**
CAD, Process identification 155
**Principal components analysis**
Neural networks, Training 205
**Process identification**
CAD, Petrochemical industry 155
**Pulp and paper industry**
Fault-tolerant control, State estimation 171

**Radial basis function networks**
Non-linear processes, Activation functions 189
**Rapid thermal processing**
Adaptive control, Parameter estimation 3
**Relative order two**
PID action, Robustness 17
**Robustness**
Relative order two, PID action 17

**Spray etching**
State estimation, Kalman filters 87
**State controller**
Distillation, State observer 179
**State estimation**
Kalman filters, Spray etching 87
Fault-tolerant control, Pulp and paper industry 171
**State observer**
Distillation, State controller 179
**Stirred tank reactors**
